

TRINK MEER TEE

OUR STORY

Could it really be a coincidence that tea and baltic sea rhyme?
We don't think so.

Inspired by the Nordic sea coast, we have created tea blends that makes you think of rubber boots, rain wear, fishermen hats and sailor bags. Fine taste corresponds with rough climate. And all of this of course in organic quality.

ORGANIC TEAS IN TEA POUCHES & TINS

ORGANIC TEAS IN TWO TYPES OF PACKAGING

Whether loose tea in a tin or pre-portioned in a hand-sewn pillow bag for a 0.3-0.4 liter portion – the choice is entirely up to you and your individual needs. The tea quality is the same.

TO THE RESCUE
RETTE MIT, WER KANN

Organic herbal infusion
Spices, ginger and turmeric

Around the clock and in any weather conditions in the North and Baltic Sea – since 1865, the sea rescuers of the German Maritime Search and Rescue Association (DGzRS) have been rescuing people in distress, financed only by donations. We say 'to the rescue' and donate 50 cents for every box and tin sold to the DGzRS.

Out on the open sea in the North and Baltic Sea, things can get really rough. But fortunately, the sea rescuers of the DGzRS are never far away. Their mission is crystal clear: to save shipwrecked people from distress. To free people from danger, to care for the injured and sick. Since their foundation, they have rescued over 85,000 people from imminent danger, and they do so in all weather conditions. Such an effort is priceless, and yet it is entirely funded by donations. That's why we at TRINK MEER TEE want to contribute and donate 50 cents for every package sold to the sea rescuers.

This tea is just right after an exciting rescue. The warming effect of classic herbs is enhanced by exotic spices such as cardamom, ginger, and turmeric. Mango chips give the tea a touch of fruity sweetness.

Our new tea blend, **RETTE MIT, WER KANN (TO THE RESCUE)** is a cooperation with the German Maritime Search and Rescue Association.

NATURALLY ORGANIC AND SUSTAINABLE

NATURALLY ORGANIC

There are many arguments for tea from certified organic farming. Here is our hit list:

Real taste:

The organic ingredients in our tea blends are produced without genetic engineering. We use only high-quality aroma components made from the respective food name-sake. That's why our teas taste like they should - naturally good.

Pesticide-free:

All teas are regularly tested by independent laboratories for carefree enjoyment.

Fair trading:

Fair prices and fair trading are very important to us. We pay good money for good quality, maintain long-term supplier relationships, and thus create incentives for better working conditions in the growing areas.

Holistic thinking:

Controlled organic farming has many positive facets. It conserves resources, protects the environment, and thus contributes to maintaining a good livelihood for humans and animals.

SUSTAINABILITY

Unfortunately, we can't do without packaging because it protects our valuable teas from moisture and foreign aromas, among other things. This increases durability and reduces waste. We are constantly working to minimize packaging materials and use the most sustainable materials possible.
